

**INFINITY**

Motor Driven Roller conveyor

## Complete control at your finger tips

Infinity MDR conveyor gives you unmatched control over the transport of goods in your facility as speed and direction can be precisely controlled. We offer an extensive range of standard roller sections, curves, and diverters, enabling you to precisely customize your line to the unique needs of your production facility.

### Key features

- Various roller lengths available
- Zero-pressure accumulation
- Tapered rollers allow product to maintain its alignment through curved sections
- Belt units available for incline/decline applications where rollers are not ideal
- Ball roller and omni wheel sections allow for transport with minimal force
- Multiple control options available
- Easy mechanical and electrical installation

### Diverter and sortation modules offered

- 30/45/90 degree Pop Up Transfer
- Multiple angle sorter 30/45/90 degree transfer
