

INFINITY

Pallet conveyor systems

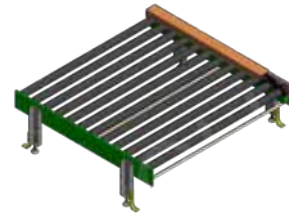

Bringing order to the chaos

Infinity pallet conveyor systems are designed to reinvigorate your organizational process and take efficiency to the next level. Featuring a wide range of conveyor sections, Infinity gives you the ability to customize your conveyor to the unique needs of your operations. Our pallet conveyor is also designed to be integrated with automated storage and retrieval systems and our line of AGVs.

Key features

- Capable of transporting a variety of pallet sizes
- Manual pallet handling can be eliminated with automatic pallet destacking units
- Pallet squaring units provide pallet stacks with increased stability and integrity
- Popup stop and 90-degree transfer units ensure accurate positioning improving the loading process
- Designed for integration with Infinity AGVs
- Barcode readers and pallet checkers ensure consistent quality and accurate organization of materials
